

Hand Held Highly Sensitive Metal Detector

OPERATING MANUAL

Schematic View

- 1. Detection Face
- 2. 3. 4. LED (Green for power, yellow for under-voltage and red for alarm)
- 5. Power Switch
- 6. Sensitivity adjuster
- 7. Handle
- 8. Battery Lid
- 9. Rechargeable Battery Socket
- 10. Hand off Switch (audio, light, vibration)

Applications :

1. Electronic detection inspection at airports , railway stations and wharfs;
2. Security inspection of customs, public securities , frontier defense and safeguard authorities;
3. Quality inspection of medicine and food commercial systems;
4. Security inspection of important sites and playgrounds ;
5. Noble metal detection , such as gold or silver jewerry manufact-uring plants.

Detection distance

1. Pin	30-60mm
2. 64 model handgun	150mm
3. 6 inch long knife	160mm
4. Diameter	20mm
5. Steel ball	90mm

Features

1. Highly sensitive.
2. Simple and convenient to use , no adjustmenttis required;
3. The detection distance will not be changed when the battery voltage drops from 9V to about 7V;
4. Low power consumption , can work for 40 hours continysly;
5. There is automatic and continues alarm when the battery is used up;
6. Switch on/off audio prompt function;
7. Witch external rechargeable socket hole;

8. Has audio, light and vibration hand off switch.

Install and replace battery:

1. The battery lid can be opened by pushing backward with thumb at the concave groove.
2. Install the 6F22 (9V) battery according to the anode and cathode signs on the battery lid.
3. Cover with the battery lid and push forward firmly.

Method to use

1. Turn on the power switch (5), if a click sound is heard, it indicates that the power has been connected, and the green LED will turn on at the same time. If the click sound is heard, it indicates that no battery has been installed or the battery is not well connected. If the click sound is heard one after another, it indicates that the battery cannot be used any more and a new battery shall be installed.
2. When the switch-on click sound stops, the highly sensitivity detection can be performed. Grasp the handle and detect with the detection face around the object.

Applications :

1. Electronic detection inspection at airports , railway stations and wharfs;
2. Security inspection of customs, public securities , frontier defense and safeguard authorities;
3. Quality inspection of medicine and food commercial systems;
4. Security inspection of important sites and playgrounds ;
5. Noble metal detection , such as gold or silver jewerry manufact-uring plants.
